# Lettuce - Crisp head

## CRISP

### AVATAR

Avatar is an extremely uniform crisp lettuce with a neat frame and butt. Head size is medium large with bright, uniform, dark green leaves. Avatar is suited to the fresh box pack, pre pack heads and processing markets, with a good shelf life, and can be harvested late autumn and spring in Werribee and Gippsland

**CA V-VIII**

### AZTEC SUN

Aztec Sun will harvest in the Raider slot, but should produce larger heads, with well raised butts, during the warm seasons. Head size is large, round to flat with dark glossy green leaves. Aztec Sun is suited to the fresh and processing markets, filling cartons well, with a longshelf life

**IR: Rs, tipburn and moderate bolt tolerance**

**Aztec Sun**

## DISEASE KEY DEFINITIONS

**HR:** Highly resistant plant varieties would highly restrict the growth and development of the specified pest or pathogen under normal growing conditions and pest pressure when compared to susceptible varieties. These plant varieties may, however, exhibit some symptoms or damage under heavy pest pressure or stressful growing conditions.

**IR:** Intermediately resistant plant varieties would restrict the growth and development of the specified pest or pathogen. The plant variety may however exhibit a greater range or degree of symptoms when compared to a highly resistant variety. Intermediately resistant plant varieties will still show less severe symptoms or disease damage than susceptible plant varieties when the crop is grown under similar environmental conditions and is subjected to the same disease or pest pressure.

**BI** - Downy mildew (*Bremia lactucae*)

**CA V-V111** - Downy mildew (*California races*)

**Fol** - Fusarium wilt (*Fusarium oxysporum f.sp. lactucae*)

**LMV** - Lettuce mosaic virus

**Nr** - Lettuce leaf aphid (*Nasanovia ribisnigri*)

**Rs** - Corky root (*Rhizoharpis suberifaciens*)

## DISCLAIMER

Lefroy Valley carries out trialling throughout Australia/New Zealand prior to releasing varieties into the market place. We strongly recommend that all varieties be trialed under your growing conditions prior to commercial sowings taking place. For details of up-to-date technical information & trial results in your area please contact Lefroy Valley. This information is valid at the date of publication. All cultural and descriptive information is supplied in good faith as a guide only. Varietal performance is influenced by many variables, namely climatic, soil conditions, cultural and management practices. No liability will be accepted by Lefroy Valley or its representatives as to final performance based on this information.
