

roma tomato

SHEENA F1

- *Semi determinate roma*
- *Large uniform fruit*
- *HR to TSWV & F3*

Sheena is a high yielding semi determinate roma tomato suitable for low staking with minimal pruning or ground growing. High concentrated yield of large, uniform egg-shaped roma fruit. Good disease package with resistance to TSWV and Fol 0-2.

Plant:	Vigorous semi determinate plant. Suitable to low staking with minimal pruning, or ground growing.
Fruit:	Large 110-140g uniform egg shaped roma, non green-shoulder, firm at red
Characteristics:	High yielding semi determinate roma with outstanding disease package. Highly adaptable variety.
Disease resistance:	HR to V, ToMV, Mi, TSWV, Fol 0-2
Key:	V - Verticillium wilt ToMV - Tomato Mosaic Virus Mi - Nematode TSWV - Tomato Spotted Wilt Virus Fol 0-2 - Fusarium wilt race 3

Highly resistant plant varieties would highly restrict the growth and development of the specified pest or pathogen under normal growing conditions and pest pressure when compared to susceptible varieties. These plant varieties may, however, exhibit some symptoms or damage under heavy pest pressure or stressful growing conditions.

Disclaimer: Lefroy Valley carries out trialing throughout Australia/New Zealand prior to releasing varieties into the market place. We strongly recommend that all varieties be trialed under your growing conditions prior to commercial sowings taking place. For details of up-to-date technical information & trial results in your area please contact Lefroy Valley. This information is valid at the date of publication. All cultural and descriptive information is supplied in good faith as a guide only. Varietal performance is influenced by many variables, namely climatic, soil conditions, cultural and management practices. No liability will be accepted by Lefroy Valley or its representatives as to final performance based on this information.
