

Segment: Tomato loose
Large-Medium,
Protected unheated
Open Field

Variety: **Swanson**

Resistances:

HR: ToMV/TSWV/Fol:0,1*/Va/Vd/Ma/Mi/Mj

Introduction

Very productive variety with TSWV resistance. Makes uniform fruit with a good red colour and sets well in hot conditions. Suitable for both protected and open field (staked) crops.

General

- | | |
|-------------------|-----------------------------------|
| · harvest | loose |
| · yield potential | high |
| · earliness | normal |
| · season | spring |
| · structure | protected unheated and open field |

Key: ToMV - Tomato mosaic virus TSWV - Tomato Spotted Wilt Fol - Fusarium wilt
Va - Verticillium wilt Vd - Verticillium wilt Ma - Root-knot Mi - Root-knot
Mj- Root-knot

NB: *Fol 0,1 was F2

HR: **Highly resistant** plant varieties would highly restrict the growth and development of the specified pest or pathogen under normal growing conditions and pest pressure when compared to susceptible varieties. These plant varieties may, however, exhibit some symptoms or damage under heavy pest pressure or stressful growing conditions.

Fruit

| | |
|----------------------|----------------------|
| · average weight | 160-210 gram |
| · colour | red |
| · shape | deep oblate |
| · ribs | slightly ribbed |
| · green shoulder | no |
| · locules | 3-4 |
| · firmness | firm (60-80 Durofel) |
| · shelf-life | about 10-14 days |
| · brix level | 4-5° |
| · cracking tolerance | high |
| · micro-cracking | not sensitive |

Plant

| | |
|-------------------|------------|
| · vigour | moderate |
| · plant length | moderate |
| · leaf cover | open |
| · plant character | generative |

Remarks

Dark green plant. Variety performs very well when it is grown from cool conditions going into the summer (spring). Planted in the spring it is an excellent variety, both in greenhouse and open field.
